

## advanced features

### Microprocessor Control Boards

are designed and built at DoorKing's manufacturing facility in Inglewood, CA, assuring a long lasting trouble free system

### Gate Tracker™

output reports gate operator data to a companion DoorKing access control system (1803PC, 1815, 1817, 1818)

### Screw drive

system on models 601, 602 actuators provide smooth and quiet operation

**Programming switches**  
to set desired mode of operation

**Worm drive**  
provides smooth quiet operation

## twice as safe

DoorKing operators are designed with a two stage, self-monitoring state of the art inherent entrapment protection system that is second to none in the industry.

### Twice as Safe

Designed with safety as the number 1 priority, these operators feature an electronic and mechanical inherent reverse system. DoorKing operators are known in the industry as being the safest vehicular gate operators available
